

Which hearing aid is right for you?

Within a hearing aid advice appointment, information will be provided on the different range of hearing aids and the individual features.

Receiver In Canal (RIC)

Small, discreet and quick to fit. Perfect for first-time hearing aid wearers.

Advantages

- ✓ Typically smaller & more discreet than a BTE
- ✓ Can fit “open,” more natural sound quality
- ✓ Rechargeable available
- ✓ Direct connectivity to Bluetooth devices

To consider

- Quick to fit (can take home the same day)
- Speaker susceptible to earwax and clogging

Behind-The-Ear (BTE)

Provides the most amplification, making them the preferred solution for people with severe-to-profound hearing loss.

Advantages

- ✓ Comfortable since it doesn't sit deep in your ear
- ✓ Available with thin tube or personalised ear mould
- ✓ Despite the size they are barely visible when worn
- ✓ Easy to handle and clean
- ✓ Rechargeable available
- ✓ Direct connectivity to Bluetooth devices

To consider

- Quick to fit (can take home the same day)
- Available in mini, standard and power

In-The-Ear (ITE)

Custom hearing aid that fits within the outer portion of the ear. Larger battery provides longer battery life.

Advantages

- ✓ Custom fit to your ear
- ✓ Larger battery provides longer battery life
- ✓ Can include controls for volume and memory
- ✓ Rechargeable available
- ✓ Direct connectivity to Bluetooth devices

To consider

- Largest of the custom styles
- Can be made full or half shell
- May pick up more wind noise

Invisibler (IIC)

Hearing aids placed inside the ear, custom-made to best fit each client.

Advantages

- ✓ Rests in the second bend of the ear canal where no one can see them.
- ✓ Custom-fit to your ear
- ✓ The smallest, most discreet hearing aid made
- ✓ Rests deep in the second bend of your ear canal

To consider

- Small size may be challenging to wearers with dexterity issues
- Small batteries require more frequent changing
- Small size cannot accommodate manual volume or memory controls

Completely In Canal (CIC)

Only the tiny removal handle of the hearing aid shows outside of the ear canal.

Advantages

- ✓ Custom fit to your ear
- ✓ Our second smallest custom hearing aid style
- ✓ Less visible than larger custom styles

To consider

- Small size may be challenging to wearers with dexterity issues
- Small batteries require more frequent changing

In-The-Canal (ITC)

Custom hearing aid that fits in the ear canal. Smaller portion shows in the outer ear.

Advantages

- ✓ Custom-fit to your ear
- ✓ Less visible than larger custom styles
- ✓ Can include controls for volume and memory that won't fit on smaller custom hearing aids
- ✓ Direct connectivity to Bluetooth devices

To consider

- Second largest custom style
- Small size may be challenging to wearers with dexterity issues
- Small batteries require more frequent changing - rechargeable is available in select style
